

## SCHOOLS

### Elementastic Science Camp

Elementastic Science Camp founder Dr. Angelika Henke, above, explains the science behind the "popping" of popcorn during the recent science camp held on the University of Wisconsin-Sheboygan campus. Additional youth programming will be offered in August. For more information, call the UW-Sheboygan Continuing Education Office at (920) 459-6617.

Above, science camp student Erica Winter learns about the power of air and wind speed during an experiment. At right, instructor Amber Wittmus instructs student Janine Moreno in creating "lava" for "volcanoes." Submitted photos

Nathan Peterson, foreground, and Benjamin Bachmann create "slime."
